

Rota Block Large

Product Info:

The Rota Block Large is a multi-connecting, free standing ballast support block for use with mesh or hoarding fence panels.

Designed to provide extra stability to your fencing, the system is effective against strong winds and unfavourable weather conditions. In wind speed testing, 2 water filled Rota Blocks with hoarding withstood speeds of up to 62.4 mph.

Installation is easy, with each water filled block sitting over a fence panel leg on the floor plate. Emptying is just as easy, using the bung located at the base of each block.

If increased ballast is needed, then Rota Blocks can be linked together.

Key Features:

- Recycled MDPE
- Simple Assembly
- Able to be Deployed by One Person
- Linkable Units for Extra Ballast
- Robust, Stackable Design
- Easy Transportation & Storage
- Colour Option Available

Specifications:

Product	Rota Block Large
Length	640mm
Width	730mm
Height	960mm
Weight (E / F)	22 / 333 kg
Colour	Black / Custom
